### Content Management

ID	file	Journey Stage	Description	Age	Gender of gender	Story	Mood Rate	Edit	Detele	User admin	Status
01		Camp	Description01	3	Male	Story01	(rate value)			username admin	Pending
02		<a href="#">Transit</a>			Female	Story02	(rate value)			username admin	Completed
03		Future			Female	Story03	(rate value)			username admin	Completed
04		Camp			Male	Story04	rate value)			username admin	Pending

@tanya

- Content Management
- Organisation
- Settings

username@gmail.com

- Profile
- Log out

The sections 'User profile', 'Organization, and Settings' will be implemented as part of the 2nd milestone as we need to confirm some information but we need to create the page for it.

@Kryssi and Steve

- User's Profile
- What type of information to show?
- Who will log in?
- Login details?

@tanya

Small thumbnail-hover to preview it on a modal

Show maximum 15 words aprox.?  
@Krissy, you decide. I would suggest something not too long.

Show the rate value and the relevant icon (possitive, sad, funny...)

TBC  
Once we know how login and business roles and user work best, then we

Feature 'Status'  
Completed  
Pending

This feature will allow the user:

- Freedom to create a new entry on the DB in short time leaving blank fields (but the mandatory) due to lack of time or missing information.
- Status Completed then this entrv can be seen

## Upload Form

All fields are mandatory in order to submit and view this file onto the database list.  
If you can not filled all the fields now, press Save this form and Edit the file later. Thank you!

Got it! Do not show this message again. ✕

Choose file

## @Tasks on GitHub

### Organisation

Based on the Call Notes Actions from last call 'Note that Org, Country of Org, and Date should be added automatically to object on upload - Questions for Pilot and how to get feedback: Cath and Rachel will discuss with Valentina (Note: Rachel away from Friday 5 Aug but can still check in)The information saved in here what the user will see on the drop-down auto-selector.

What type of information do we need to show here?

## Tasks on GitHub

### Settings

1. Languages??
2. Analytics (to do it with HDX and DU- at the moment is not going to be developed. We need to have a meeting with partners)

no Journey stages setting because they want a kind of tag system

About 'languages' ask them what and how they need to do the translation and localisation and what information has to be translated and localised ( labels on the system or the text of the frontend?)
